

## Data Storage provision with HSM

Nadia Tonello

Head of Data Management, BSC

The DICE project has received funding from the European Union's Horizon 2020 project call H2020-INFRAEOSC-2018-2020 under Grant Agreement no. 101017207

# BSC - Barcelona Supercomputing Center

## The MareNostrum 4 supercomputer

Total peak performance: **13,9 Pflops/s**

## The Ágora HSM Storage

Total capacity: **150 PB**

Access: [prace-ri.eu/hpc-access](https://prace-ri.eu/hpc-access)

Access: [bsc.es/res-intranet](https://bsc.es/res-intranet)

# BSC multidisciplinary shared storage

HSM Hybrid system:  
tape library and disk frontend  
Connected to computing  
HPC and Cloud  
EUDAT data services deployed:  
B2SAFE + B2HANDLE  
B2DROP for BSC collaborations

## Use case: CompBioMed data support

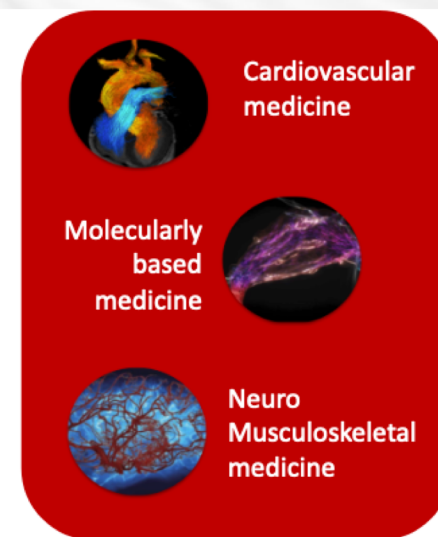

Development of a data management workflow to facilitate simulations using large datasets and for Exascale simulations.

Promote the access to the workflow to different HPC (e.g.: LRZ, EPCC), research and medical centers in the future.

Data Repository for data publication. Metadata schema Integrated with B2FIND for harvesting data and findability

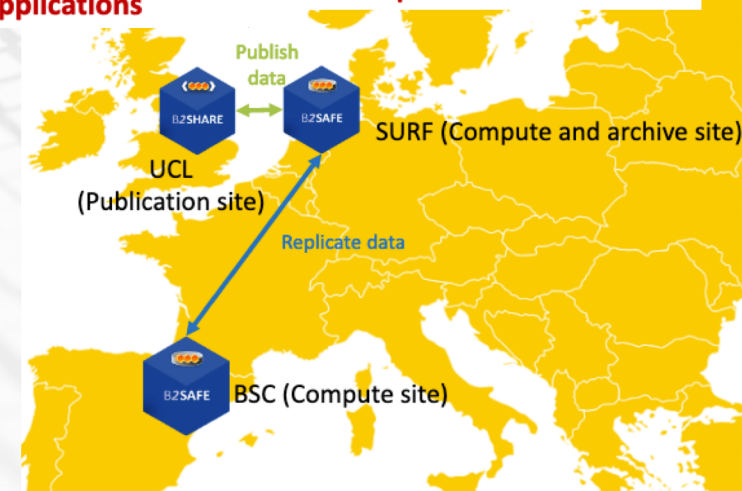

Data staging and safe replication of research data between HPC centers, on tape that facilitate long-term preservation of the data.

CompBioMed Applications

Computational Resources

## VA services provision

	Service	Access
During DICE	<p>HSM storage</p> <ul style="list-style-type: none"> <li>• mid/long term (+computing)</li> <li>• Typical Project size: 10-100 TB</li> </ul> <p>Possibility to provide B2SAFE under request</p> <p>B2DROP access only for BSC new projects</p>	<p>Virtual Access: 500 TB per day total HSM storage</p> <p>Granted until the end of the DICE Project (mid 2023)</p> <p>Direct request: <a href="mailto:datamanagement@bsc.es">datamanagement@bsc.es</a></p>

## VA services provision

During  
DICE

Service	Access
