FAIR Data Management Gaps and Solutions

Joint effort from two EU funded projects

- ## EOSC-pillar
  - It coordinates national Open Science efforts across Austria, Belgium, France, Germany and Italy, and ensures their contribution and readiness for the implementation of the EOSC
  - The consortium performed the National Initiatives survey, which also addressed FAIRness of data repositories and identified gaps and challenges

- ## DICE
  - It aims to enable a European storage and data management infrastructure for EOSC
  - It offers to European researchers and scientific communities generic services to store, find, share, and access data supporting FAIRness of data; among those:
    - B2HANDLE: service for storing, managing and accessing persistent identifiers
    - B2FIND: metadata indexing service and discovery portal
    - B2SHARE: data repository service

Agenda

11:00 – 11.05	Welcome and Introduction	Debora Testi (CINECA, DICE project)
11:05 – 11.15	FAIRNess of data in EU countries - a landscape study Challenges and gaps in reaching fairness of data	Federica Tanlongo / Sara di Giorgio (GARR, EOSC-Pillar project)
11:15 – 11.23	Aggregation of data repositories - increase findability with B2FIND	Claudia Martens (DKRZ, DICE project)
11:23 – 11.31	Persistent identifiers for research data - B2HANDLE	Themis Zamani (GRNET, DICE project)
11:31 – 11.40	Making data available and re-usable with B2SHARE	Chris Ariyo (CSC, DICE project)
11:40 – 12:00	Open discussion	

Some logistics information

- This webinar is recorded

- The slides and the recording will be made available via the projects' websites

- Please keep questions for the end

- If you prefer, you can use the chat to drop us your questions

Q&As

* We would like to collect some inputs from you to be discussed
    * Click this link: https://app.sli.do/event/5zv5RY8exnCckze429DAzq
    * Visit slido.com and type in #EOSCPillarDICE

* Please raise your hand to make questions/comments and we will give you the floor
